# Positive Proof of FORD ECONOMY

City of Detroit purchases 137 new Ford cars Hundreds now in use prove low cost of operation

THESE 137 new Ford cars represent one of the largest deliveries ever made to a municipality at one time.

21 radio-equipped Ford scout cars were traded in on this purchase. They had been operated day and night for two years in heavy traffic and all kinds of weather.

Their individual records ranged from 78,434 miles to 143,723 miles with a grand total of 2,203,097 miles. The operating cost of the 21 cars was 2.284 cents a mile - less than 2 1/3 cents. This cost included all fuel, oil, tires, repairs and every other item except depreciation and insurance.

Of 577 Ford cars in Detroit City service. the 300 in the Police Department traveled s total of 6,591,937 miles during the past fiscal year, at an average cost of 2.9 cents

Many claims have been made on operating costs, but here in the carefully kept motor car records of the City of Detroit is positive proof of Ford economy.

In the paragraphs above, it is seen that 21 Ford scout cars averaged less than 2 1/3

cents a mile and 300 Ford cars in all branches of Detroit police work averaged 2.9 cents a mile! Day and night, twenty-four hours a day,

these Ford cars are in operation. Few branches of transportation demand such grueling service. The records show that low fuel and oil consumption is but one of the Ford's many economies. Ford materials, simplicity of design and accuracy in manufacturing provide unusual strength, stamina and freedom from replacements and repairs.

The individual car buyer as well as the purchasing department of a city or a business cannot afford to ignore the proved economy of the Ford car.

### PROTEGEE - \$ VICTORY AND 缀 DEFEAT

By Fannie Hurst

VERY one commented on the tragedy of Ula Lee hiding her light under a bushel basket. That her genius was not only comparable but superior to the pretty singing talent of her piece Marcia was generally conceded by all who knew the rather unique situation of the young woman, Ula Lee, who at twenty was already so valiantly sacrificing herself in behalf of fostering the much slenderer talent of the fair young

Ula was a singing teacher. At the death of her sister when her niece Marcia came to live with her, Ula's interests in her own career suddenly changed to interests focusing upon the younger girl. It was not so much with a consciousness of what she was sacrificing. It was probably a surge of something latent and maternal in Ula manifesting leself at the appearance of this orphan girl in her house-

Whatever secret ambitions and innate consciousness of her own vocal potentialities may have lurked within Ula, the coming of Marcin sidetracked them to such an extent that they seldom floated to the surface of her con-

It is possible that this was made easier by the fact that Ula's future, for the past few years, had been excitingly bound up with that of a young architect who was just beginning to lay the firm foundations of a career that promised well. Felix Ermin and Pla Lee were ideally compatible, He loved her music and she in turn wa filled with the conviction that a great career lay ahead for Felix in the ful-Allment of his splendid art.

Those were happy days for the young pair, filled with struggle, it is true, but the kind of struggle made glamorous by the promise of tomor

Then Marcia came, A dark, vigorous girl only four years younger than her aunt, but full of immaturitles that made her charmingly the child. It was then that Ula's personal ambitions began to fade behind the dominant, effervescing personality that was Marcia. The girl had a roice, no doubt of that. Thinner, flutler than Ula's, with not so strong a middle register, but one of those pyrotechnical coloratura sopranos. With this voice, Ula worked for four own light began recede, Marcia's came forward.

They were busy, formative years, making a veritable beehive of the little home which Ula shared with her

But do not think that into any of there sacrificial days and nights, when there entered into the young aunt's zeal for the young niere self-denial that was unknown even to her intimates, self-pity or even self-realization dasyned upon Ula.

She had long since begun to realize, taking stock of herself as a person, that the kind of success she most desired in life did not extend beyond the four walls she was to share with Felix Ermin. It was, perhaps, an embarrassing realization with which to be confronted. The world which Ula most desired was the homely one

There was a dream of a rambling frame house set in the center of n lawn which was to be the center of the paradise of earth, so far as she was concerned. It was not all sacriace, then, to throw her heart and soul into Marcia's destiny. By instinct, by temperament and by personality, Marn was the sort of person who helonged to the world. She was restless of restraint, coverous of adulation and slowing with the vitality of a poten-

It took the coming of Marcia to make Ula realize all this. No longer was she torn between her natural instinct for a home-life with Fellx, and the career of a voice. Marcia had tome to solve that most perplexing of broblems. Marcia was tila's proxy. In a way, it is understandable why "la threw herself with such wholebearted zeal into preparing the younger airl to trend the ways her own feelings were so willingly, so gratefully foregoing.

When Marcia was twenty one, the was ready for an audition before an vera committee. Her nunts wide in her product was nothing short of obsession. There was no doubt that tha bad turned out an accomplished

inger—one with high prospects. The crushing defeat came to Cla with sa little of the dramatic in it that she scarcely realized the blow until after it had been struck. It must tave been in the way they did it. No

Quite simply, Marcia and Fellz came d Ula two weeks before Marein was to oppear in her andition before the opera committee and confessed their dom and set about reconstructing an

ness and slid from under her feet in a landslide. But life must be mineral matter (ash), is per cent; wa-

lived. Ula proposed to live it vallage ly. Two weeks later, she appeare before the opera comulttee in placof Marcia, who was honeymooning :

Phone 52-2

Havann. There was never a time after that when I'ln's success feltered. In two years, she was singled the most in portant soprano roles with the mos-Important opera company in the world.

Inestiably, the pharaphernalia of grandeur wound itself around the sha ple person of Ula. She became a diva. a public figure and one of whom was expected the intricate and bedecke!

Externally, aided and abetted by advisors, impressarios, agents and secr. taries, she fulfilled these requirements, supplying the press with the necessary complicated detail of what was in reality her simple life, and appearing before the public with all the attentant glamour expected of one in her brilliant role of singing-bird of fine plumage.

Every spring, in the interval be tween the end of the ardnous opera season and her salling for Europe, Ula visits the Felix Ermins back in the town where a young singing tencher coached her aleca toward fame.

The Fell's Ermins live in a rambling frame house, set in a wide area of great lawn on one of the nice streets of the little town. Felix is a locally successful architect. There are three children. Marcia, who is a bit too plump, still is obstreperously young In her vivacity and filled with a dark glow that lends much to her personality.

To Uta, the rambling frame house, set in the center of the elaborate lawn, is the center of the paradise of the earth. Her visits there are as terrible to ber an they are beautiful Marcia, as she watches her, is the find their electricities appointed to most to be envied and the most to be loved human being on earth.

And yet, there is no knowing Mareta. She reveals nothing by manner or word. Nor does Folix, Ostensibly they are a happy pair, rearing a happy family in the midst of stability, prosperity and well being.

Samellars of an evening during these brief normal visits of Ua to the home of the Fellx Ermins, Marcia's slitted tyes, regarding Ula, are filled with pretty nearly every kind of deteat there in

### ODD THINGS AND NEW-By Lame Bode

Explorers Have Mapped

Out Gld Mother Earth Are there any more great rivers left anywhere on the globe for man to explore? Only a little more than fifty years ago bold adventurers of a half dozen nations were plunging into the depths of Africa, not to be heard from again for menths and years, and perhaps never to emerge at all. Burton and Speke, Grant and Baker, Stanley, Kandt and Raumann, and a hundred more were seeking to find the source of the Nile. Conversely, others were trying to unriddle the puzzle of the Lonlaba, the mighty river which flowed in central Africa, going notally knew whither. It was Stanley who rerealed the unsuspected magnitude of that river system and succeeded after almost incredible hardships in followlog it to its mouth. It and the Congo were one, but the Congo then had been traced only a hundred miles inland from the Atlantic. But after all is said, what marvel can compare with the wonder of the Mississippi as it carried Marquette below the mouth of the Oblo and La Salle all the way to the gult? A few more years and men will be longing for new planets to

### Alleges Distemper Is

cording to a report of Dr. 1 cites Medle to the French Academy of Selences, man is bling the des rather seriously-by serving an a re-evolr for the dreaded distemper which hills

Portor Sicolle found that serum from the blood of human to have the normated with the distempt strus produced the discase in pupiles, while man was immune. Animals serve as carriers for numerous human diseases -taln for bubonic playue, rattle for tuberculosis, etc. This is one of the first cases on record where it is always that mon may be the carrier of an antmal disease.

Doctor Nicollet Interprets his findlogs as showing that the human race was subject to the distemper virus long before the canines and through the ages developed immunity to it. Now man contracts the disease only In such an attenuated form that there are no recognizable symptoms. The dog has not had time to develop this natural liminantly.

Ilun Warriors Unearthed Discovery of some graves of the terrible Huns, who ravaged southern Europo during the first few centuries after Cortal aids in tracing the conprellop of apelent Mongolia with the East and West. The finds show both Chinese and a Grestan toffneuce. Almost all the tombs contained golden ornaments, topostries, corpets, weapons or fauls. The remains of these Mongolian princes were hadly pre-served, only the hale being latact. Approximately the of the flow gensex arre located by the Rosloff expedition valued presented with a caravan of 30 remels to the region near tiegs, north edst Moddella. The colless lay in sulterranean mansaleums constructed of charge. This ces had rifled many of the tombs, but while taking much of value did not destroy the rest.

To Ireland for Sunsale

The success seen from the western coast of Irriand are accounted the most famous in the world, not only by the Irlsh, but by American tourists, who cannot ledp adding to the glory of the scene by imagining their homeland in the heart of the golden West. Riand on the strand at, say Hartran, the pretty little ellinge near Marrisk, and watch the ball of fire alipping down to rest behind Aahill, with all the tumbling bills ablave at their sumsolls with the borrowed light, and you will admit that the Irish know how to arrange their someets. At such an heur unbow temerrow and dead yea-terday are all in oblivion.—Exchange.

Use for Rice Grass

A rice grass that appeared in Essex, England, about 60 years ago, is being used to reclaim land from the sea and also to guard sea walls. It is a rushlike growth that has the peculiar property of collecting mud, thus raising the shore level inch by inch and adding shore land that can be used for pasture or tillage. The grass is being exported to other countries where it will be employed for the same purposes,

Statesmen in Council

The British house of commons, when In session, sits from 2:45 to 11 on Monday, Tuesday, Wednesday and Thursday and from 12 to 5 on Friday. It begins with uncontentious private bills and other formal business. Questions to ministers (which are not put on Fridays) occupy, or may occupy, tions have been disposed of the public business of the day begins. Opposed business is not taken after 11, unless it belongs to a special "exempted" class or unless the 11 o'clock rule is

Old New Jersey Grant Sold An old document in connection with Sunday. America's early days was sold at aucthe conquest of America of 100,000 neres of land in New Jersey. The duclow (England) man more than 40 years ago and until recently it lay neglected amongst his household lumber.

Aristotle's Wisdom A reader is kind enough to remind Following is the program: me, writes "Peter Simple" in the London Morning Post, of how Aristotle onco "said a monthful," which is strangely applicable to the present

"Valu men," said Aristotle, "are fools as well as ignorant of themselves, and make this plain to all the world; for, not doubting their worth, they undertake honorable offices, and presently stand convicted of Incapacity."

Roman Colosseum

The great amphilhenter at home known as the colosseder consisted orlylimity of three prended stories of stone and an upper callery of wood. The upper gallery was later rebuilt of stone. It was elliptical in plan with its long oxis 615 feet and its short axis 510 feet. The arena was 241 feet long and 177 feet wide. The seating enparity of the colorseum was probably between 40,000 and 50,000, although some authorities put the figure as high as 70,000. Though it was the largest of the Roman arenas, It has been exceeded in size by more than one modern amphitheater.

Old Washington Churches The oldest caurch in the city of Washington is Christ church (Protestant Episcopall, forated on O street S. E., between Sixth and Seventh atreets. It was erected in 1703.

Another old church in St. John's (Episcopal), on the northwest corner the United States.

Trees 8,000 Years Old

## Thanksgiving

We are slowly emerging from what has been considered the severest business depression within the memory of many substantial business men of today. New England has been much more fortunate than other sections of the country during their trying period. Maine has probably been better off than some of the other New England States. We people of Maine have much for which to be thankful this year 1931.

Traveling Cinemas

Traveling moving picture shows are the latest cinematic development in Soviet Russia. At present there are more than 1,200 such units traveling from one village to another. The popularity of the exhibitions may be judged by their rapid growth in number during the past two years. At the end of 1025 there were less than 400 traveling movies. This figure rose in 1920 to 900, and for the present year It is planned to produce 2,000 projectors.-Washington Star.

What Do You Give? A New York vocational guidance expert advises people who are not happy in their jobs to save their money until they can make a change. She wight say, too, that if people are not taking happiness out of their John they would do well to see that they are putting into those jobs everything they have to give. What you get out of your job upon what you are willing to put into It in a day to day effort.—Grove Patterson, in the Mobile Register,

Lake's Depth Varies The depth of Lake Titlenen, the largest lake in South America, in some places reaches 7(3) feet, but large portions of it are shallow, and the shores, especially in the south, are lined with marshy tracts covered with reeds. Tha lake receives a number of streams from the surrounding mountains and discharges through the Desaguadero into Lake Anthras, whose waters finally evaporate in the great salt marshes in the southern part of the closed basin,

Man's Food Consumption

A healthy man, with a normal appetite, who reaches seventy has eaten 700 times his own weight, according to the calculation of experts of the faculty of Paris. They have figured that in his span of seventy years the average man of 140 pounds would have eaten 13 tons of bread, 15 tons of vegetables, 7 tons of meat or 18 whole; cows; 7 tons of fruit, I dut pounds of candy and sugar, drank 15,000 guarts of milk and 20 and quarts of beer, in Europe, or water, in America.

"Don't you sometimes get lost in the woods when you go out possum bunting and get separated from your brothers?" asked a motorist in the Rumpus Ridge region,

"Nope!" replied young Banty, son of Gap Johnson. "When I don't know whur I'm at and there hain't nobody around to ask I just pick out the way know leads toward home and turn right around and go the other way; that always fotches me home by the shortest trail,"-Kunsas City Star.

Canadian Timber

It is estimated by the Dominion forest service that the only economic use for three-eighths of the land area of Canada lies in the growing of trees. This vast area of territory, while incapable of successful agricultural production, is, if permanently dedicated, protected and managed, sulted to the production of a timber crop which would guarantee for all time the supply of raw material for Canada's woodusing industries.—Natural Resources Bulletin,

London's Pall Mall

The average American and Canadian tourist may have difficulty in recognizing Pall Mall, as the "Pell Mell," to which the London policeman directs him, when he asks for the famous street. It was named after the French game Pallie-mail, which was first played here in the days of Charles L. On this street were the homes of Detoo of Robinson Cruson fame, Swift of Guilliver's Travels, Sterne of the "Sentimental Journey," and Gibbon, the historian.

Boiling Water

Water bolls at 212 degrees F. At 115 degrees a person finds water almost too hot to hold his hand in it. Fabries that will not be injured by water can be freed of living clothes moth eggs and larvae by being dipped for 10 sec. onels in water heated to 140 degrees F. Care, however, must be exercised to have and keep the water at this or a greater temperature. Larre and egas in flannel dipped for 10 seconds in water heated only to 122 degrees F. remain unaffected.

sion when the question of mushrooms came up.

not in reality tondstools?"

"Well," said Clara, "there weren't any toads sitting on them."-Kansas City Times.

Eye for Values A collector of manuscripts and first editions of early Americana found a sermon in pamphiet form in a secondknown copy of the old sermon except the one which the collector niready possessed. He paid \$500 for the sec ond copy, then took It home with him and threw it into the fireplace. The destruction of the second copy added several times its purchase price to the one the collector originally held, he explained,-Nation's Dusiness.

Roman Carnival Changed In a general way it can be said that carnival is held just before the beginning of Lent, but it exists no more in its ancient form. In Rome It is now almost wholly limited to masked balls In the theaters and its manifestations in the streets are sparse and very attenuated. On the Riviera, however, there are floats, mainly with flowers, while this aspect of carnival, once so. important, has altogether disappeared

Animals Well Trented

In Softa, Bulgaria, unimals of burimpartially enforced. Only log is of certain sine are permitted on usons and the was as must be creased resularly so they pull easily. Every onlmal pulling a forden must be presently shod and discovery east, and to be to them well, he is them treated presents when they are ill. Fowls cantal ha carried with here is down, as the is Misquotations

There is a quotation about lilble Two Smith college girls were mem- quotations over which we nearly albers of a camping party on one occa- ways go wrong. "Uven the devil." we say, "cen quote Sechture for his own purpose," Actually, thes words "Clura," said one of them with ref. are: "The devil can rite Scripture for erence to the specimens brought in, his purpose." A superior person might "these may be good mushrooms all refer to misquotation as "the last inright, but are you sufficiently expert | firmity of noble minds"; in so doing In such matters to know that they are he would make two mistakes, for it runs "That last infirmity of nobles mind."-London Tit lits.

Line Shelves With Color

Simple bookenses, of the types constructed by carpeners as well as the more elaborate stells, may be made very much more definetive by lining the shelves with color. Paint in a contrasting shade may prove very suchand book shop. It was the only cessful for this purpose, and small figured wallpaper limiters are also very attractive.

### Stops Headache in Five Minutes

A Wonderful Formula Ends Achee and Pains Almost Like Magie.

Something Better and Safer? Thousands of men and women are now stopping throbbing, sick, dizzy, splitting headaches, as well as the excruelating pains of rhea-matism, neuritis, toothache, etc. with a marvelous new formula that: is said to be far superior to any-

It contains no aspirin, acetanilid. atc., and is absolutely safe and harmless. This remarkable for-mula, called A-VOL, is being prescribed by thousands of doctors, dentists and welfare nurses be cause of the quick, efficient way it relieves all types of aches and pains without depressing the heart, or causing any other harmful effects. A-Vol quickly stops the most severe pain, leaving the patient rereshed and feeling fine. Especially effective in women's period pains. To quickly prove to yourself that this is truly a remarkable formulajust step into your nearest drug store and got a package of A-VOL for a few cents. Take a couple of tablets right there. If your pain is not gone in five minutes, the clerk will return your money,

Letterheads are partly paper

and partly printing. Their attractiveness is determined by what the printer puts on, as well as by what the paper maker puts in.

Letterheads, as well as other printed matter, can be purchased at a wide range of prices. You get what you pay for in a cheap job, but a quality letterhead is the best investment.

If you appreciate distinctive business stationery--or if price tempts you-just see what we have to offer.

Ash "Queen of the Woods"

The onk is spoken of us "the Monarch of the Womls," but the ash tree is "Queen of the Woods," ears the Montreal Herald, Anciest stories tell that the gods held their council beneath an ash tree, on the topmost branch of which sat an earle, watchlug the way of the world while n squirrel ran up and down the trank, carrying messages from the bird to the gods. The ash is one of the easiest trees to recognize with its straight trunk, the bark a pale gray color, Its lower branches growing atraight out from the trunk, curving grantally to the sky. The tips are quite different Up two black buds, with smaller buds at the sides. Even when other trees have put on their spring does of green, the ash tree stands here.

Weather Lore People began "speaking of the weather" a long time ago. The first scientific treatise on the weather, says the United States weather bureau, was written by Aristotle more than 300 years before the Christian rea. The weather boreau library, which is the largest meteorological collection in the world, has a big book on the weather by Albertus Magnus, printed in 1494, and a facelable of a weather journal kept by Rev. William Merie of England, who recorded the weather day by day from 1337 to 1344. The first weather records in America, so for as known, were kept by Rev. Johann Campanlus, who recorded the weather each day in the cotony of New Sweden near the present site of Wilmington, Del. for the years 1011 and 1015.

Old California City The site of tipliand, Calif. was part of the holdings of Don Luis Marin Peralia, who received your grants from the Spanish crown in 1912 he divided his lands among his four some and the two to whom this region fell established themselves on their estates. From one of them in 1830 Messa Phose legsed a tract, as I be became the founder of the future city. In 1852 the scuttement was torosporated so a town and in 1854 it was chartered as a city. The name can auggested by the grave of eaths to which the first beneva were fullt.

Pioneer Railroad Trip

Impressed New Yorkers For four days, after reading the aunouncement that the DeWitt Clinton would undertake a passenger run the full fifteen-mile length of the road, the burghers of the Hudson valley blekered. Some said the notion was absurd; some said they would keep an open mind.

Then September 24, 1831, arrived. Conductor John T. Clark, first passenger railroad conductor in the North tootled a tin horn as signal to the engineer to start, and the DeWitt Clinton, with a three-car train rocking bemind it, was oft on the first trip over the entire route from Albany to Sche It was the beginning of railroading

in New York state and the pioneer was the Mohawk & Hudson railroad, original unit of the New York Central lines. The engine bad no headlight, no bell, no whistle, no spark arrester in the

stack, no cab, But it got close up to twenty miles an hour with three coaches and did better than that on the slight downgrade. Today's electric locomotives do sixty miles an hour with a thousand-

Part of Famous Trail

Preserved in Chicago A 10-foot section of the old Cruces trall over which was carried the treasure wrested from the natives of Central and South America during the Spanish colonial times, and the gold from California in the days of the "Forty-niners," has been transferred to Chicago, where it is preserved in

the Museum of Science and Industry, The trall, which ran from the village of Las Cruces on the Charges river was partially destroyed by the construction of a road to the side of the Madden dam, built to increase the water supply of the Panama canal.

The engineers building the heavyduty concrete read to the Madden dam site removed the ancient paying stones where their modern highway crossed the old traft.

Dispute Over "Asparagus" The term asparagus is one of doubtful origin," writes Frank H. Visc telly, dictionary editor. "It has been traced to the Latin from the Greek asparagos. In Medieval Latin it oc curred as sparagus, and was found in English in the form sparago as early ns the year 1000. One scholar trace. It to aspharagous, the wladpipe. Cot grave explains the French asperge na 'the herb sparage or sparagus,' which Skeat pronounced mere corruptions of the Latin word. The French asperges is a holy water sprinkler, a term derived from the Latin aspergere, to sprinkle, get the asparagus of modern times scarcely seems suited for the purpose of sprinkling, much less so when tied up in hunches."

Valuable Accidental Find Rochelle salt was discovered accidentally in 1672 by Peter Seignette, an apothecary of the French city of Itocholle, wrote Charles II. LaWali in "Four Thousand Years of Pharmacy." It also was sometimes known as "Seignette's Salt," in honor of the alscoverer. He ascertained that the new compound had laxative properties and ndverlised it as a secret postrum called "sal polychrestrum," or "the salt of many virtues."-Detroit Nows.

Big Business Man "Napoleon," says a blographer, "was personally acquainted with every omcer, high and low, to his armies." The type who would run a bank and know 17 vice presidents by their first name. -Detroit News.

\*\*\*\*\*\*\*\*\*\* OLD AGE AND **EMPLOYMENT** 

By THOMAS ARKLE CLARK Emeritus Dean of Men, University of Illinois,

Harmon is out of a job. I saw him stolldly, discour-

aged looking and inactive. He is not locapable; he is not without education of a sort. He lus held a number a responsible jobs; he finished high school before he went to work, He dresses with care; he rends a root has Intelligence and he gives the

mpression of being a gentleman. The trouble is he is sixty years old and no one seems willing to take him on. The firm with whom he was last employed falled, went out of business. and left Harmon high and dry like a floundering ship east upon the shore by the waves. He has tried everything he could think of but to no avail.

During the last ten years the man ever forty who is out of employment has had a hard time to get a job. A man of wide experience with the Jobless says:

"That people past forty cannot get lobs became notably evident after the war, when a lot of them were thrown out of employment, and were never able to get their jobs back. Behind this is the deinsion which has swept business circles that only the young man is fit. Efficiency experts are in pact to blame. Everywhere they go, posing as god, they throw out older people; in order to sell themselves they must make changes.

"Overspecialization, too, operates ngoinst men. A man said he was refused a job as a driver of a laundry wagon because he had been a mill wagon driver."

It is true that young men may have more initiative, they think more quickly, they are more alert, though they are not likely to think more accurately. Old men take more time but they are surer. Young men are more adaptable; they learn new ways more easily, they take more risks, but they have less judgment.

There is still a place for the old man in any business where experience and Judgment count. (@ 1931, Western Newspaper Union.)

Man's Wisdom at Fault Over "Puzzle" of Life

Ever since the dawn of recorded thought wise men and great thinkers have tried to solve the puzzle of life. sorts of answers have been given.

The great Greek dramatist Sophocles said: "The best of life is not to be born." The poet Dante said: "Living is a race to death." One philosopher called life "a fallen tear which the earth drinks up," and another sald: "To fight, and ever to recommence the fight, is life."

Life has been called a comedy and a tragedy, a song and a dirge, a progress and a decay. It has been likened to a stormy and uncharted sea, to fiction and to running water. It has been dubbed an Illusion, a cheat, and a

The old Roman playwright Plautos caught one glimpse of the truth when he said: "To live well, live today"; and Balzac was not far out when he said: "Life is what one's sentiments make it"-London Tit-Bits.

Ing in Paris. And, co-Incidentally, there was the job of extricating the league from the unpleasant situation crented by Japan's fint refusal to obey its orders. The distinguished diplomats were aided in their task by Ambassador Dawes, who was instructed to proceed

Ambassador from London to act as American observer. While the council discussed ethnted and conferred, the Japanese troops went right along with their program n Manchurla. Gen. Ma Chan-shan. ommander of the Chinese army in lellungklang province, was ordered y General Honjo, Japanese commander, to withdraw his troops from inganchi and Tsitsihar, the latter the copital of the province. Ma refused o obey and the Japanese opened a ferce attack with all arms, including bembing planes which dispersed the

Chinese envalry. In bitterly cold seather the battle ruged for many ours and the Chinese were finally forced out of both the cities named. In this operation the Japanese troops sdvanced within the sphere of influence of Soviet Russin for the first time, and as Moscow had warned them against doing this, it was belleved the result might be momentous. In this big battle along the Nonni river both sides were reported to have sustained heavy casualties. Anticipating a Russian protest, Japan notified Moscow that it held the Chinese Eastern railway partly responsible for the hostilities because had transported Chinese troops.

PARIS General Dawes was much more than an observer. Indeed, he as the central figure and it was ped that in his talks with Tsunco sudaira, Japanese ambassador to compromise might be med out. Dawes also had a long Fersation with Dr. Alfred Sze, Chie delegate, which both of them said most profitable. There were ruors that the United States had come the conclusion that Japan's conten-Melals were worried. But these tories were refuted by a statement om Secretary of State Stimson to e effect that the United States stood rmly on the question of treatles and ad not thus far committed itself in ny way. Dawes and the council were rying to gather the real facts in the otroversy, and Japan was asked to ate in defail just what she demandfrom China. There was a report at Dawes and Sir John Simon, Britforeign minister, were contemplatinvoking the nine power trenty ned at Washington in 1922.

Aristide Briand, president of the ancil, though exhausted to the point Illness, was as busy as Dawes, escially in negotiations with Kenkichi shiznwa, the Japanese delegate and close friend.

From Nanking came two important tens of news. One was that the comintang congress and declared in vor of war on Japan in case the sgue should fall to settle the quar-The other was the statement of Nationalist government that It old regard any Manchurlan governat headed by Hsuan Tung, former peror, otherwise Henry Pu-yl, as a editious institution" and would re-Mato all its acts. The district is normally Republican,

DRESIDENT HOOVER announced that he had accepted the resignation of Henry P. Fletcher as chairman of the federal tariff commission to take effect on November 30. Mr. Fletcher some time ago indicated his wish to resign, but at the President's request remained in office. He had served since the commission's organizatlan, 14 months ago.

In submitting his resignation Mr. Fletcher appended a report of the commission's work, showing that by November 80 Its docket would be cleared of all applications and senate requests for information.

GERMANY and France, represent-ed by Secretary of State Buelow and M. Briand, reached an agreement on the formula by which the Germans should call for a moratorium on reparations under the terms of the Young plan, and the text of the request was presented to the world bank at Basel after the American and British representutives in Berlin had been shown the letter. The German government asks the world bank and the international powers to investigate her ability to pay the reparations and to help Germany formulate a plan to pay her private debts. The intest report of the Reichsbank snows that despite a favorable trade balance achieved by Germany in October, the Reichsbank is still very short of foreign currency.

DINO GRANDI, brilliant young forelgn minister of Italy and the mouthpiece of Premier Mussolini, has had his three days of conversations

with President Hopver and departed from Washington, well satisfied. The results of the talks have not been made public at the time of writing, but it is known that I the chief topic was disarmament, in which both Mr. Houver an Il Duce are deeply in-terested, Grandi

brought with him Augusto Rosso Signor Augusto Rosso so as ope of his chief advisers because Rosso is an expert on eaval affairs and Italy is especially concerned with the comparative strength of her navy. Signor Rosso is at present thief of the Italian foreign office division that deals with the League of Nations, and there have been blots that he might be a future ambassador to Washington.

Signor Grandi was gratified with the news that Aristide Briand, as bend of the league council, had declared officially that the one-year armament building truce is in effect as of November 1, for this truce was the suggestion of Grandi-though he called it 'an American-Latin idea." In his talks with the correspondents he said: "We think in Italy that the questlor of disarmament is the most important question existing now in the relations between countries, and that it is high time for everybody to reach some practical result." Asked for his views on war debts and reparations, he called attention to Mussolini's statement in 1022 that war debts and reparations were dependent upon each other and should be scaled down.

THEODORE DREISER, eminent auself-appointed committee that went to Kentucky to investigate the alleged ill treatment of coal miners in Bell county got themselves into a peck of trouble if the nuthorities of that state can get hold of them. The grand Jury in Bell county indicted Dreiser and his nine companions on charges of crim inal syndicalism, accusing them of seeking to promulgate a reign of terror and of suggesting disorders and resistance to the state and federal governments. Conviction carries a penally of not more than twenty-nee years' imprisonment, a fine of \$10,000

or less, or both. The commonwealth's attorney announced he would seek to extradite the alleged offenders, and Dreiser said in New York he would fight extradition. The author and Marie Derrain, one of the committee, already had been indicted for misconduct in

Kentucky hotel. DITLIP SNOWDEN, who served ably to the house of commons for a nuarter of a century and for two terms was chancellor of the exby King George and elevated to the house of peers so that he may hold the office of lord privy seal in the national government. He declined to run for re-election to the lower house because of Ill bealth.

MAHATMA GANDIII informed the British government that unless it did something for India by December 1 he would sail for Bombay on December 4 to lend a new and greater civil disobedience movement in that country. In that case it is likely he will order a social as well as a commercial boycott against the British,

which would mean that no Indians would work for British individuals. British troops were sent to Kashmir recently to help put down a Moslem revolt in that Indian state, and the Russian government protests, considering the military movement as a distinct menace to its frontier. In consequence Moscow made threats against Afghanistan which led the Afghan government to ask Turkey for the services of a military mission to reorganize its army, And Sir Harl Singh, maharajahi of Kashmir, objects to the British taking charge of his

MORE trouble has come upon the bureau of prohibition through the killing of a youth in Englewood, Colo., by Henry Dierks, a dry agent.

The people out there are greatly aroused. and the bureau start ed an investigation of the affair. Dierks, in making a raid, found the young man, Milford Smith, in possesslon of a bottle of wine and in a struggle with him clubbed him to death. The city council of Engle-

wood passed and sent to the bureau in Washington a resolution in which were set forth some of the incidents in Dierks' enreer. It charged that Dierks, while acting as an undercover man a few years ago, had employed a 17-year-old girl as an informer; that he had got drunk collecting evidence in a raid and that in 1930 he had clubbed a helpless prisoner with his revolver. Howard T. Jones, assistant director of prohibition, said this was all news to the bureau and that there was nothing in its records to the discredit of Dierks.

According to the Englewood police, Dierks fractured Smith's skull with blow with the butt of his revolver and then placed him in Jall where he remained nine hours without medical attention. Smith died soon after teing taken to a hospital.

N EGOTIATIONS between the United States and Canada for the development of the international section of the proposed St. Lawr nee serway reached the stage of first formal exchanges relating to the affocation of costs and engineering structures, and It is hoped a treaty will be ready for secute action early next year. The State department announced that the representatives of both countries "proposed to keep in touch with the reties in the consideration of the power | had to so to the eravivard bimself to leatures of the development." This is the of lamense interest to New York and Gov. Franklin Rosevelt who has op-I sed the views of the federal admin-I trailon concerning power.

The discussion so far has doubt with the 48-mile international section, extending from Ozdensburg, N. Y., to a ant opposite Cornwall, Ohlo. Secreary Stimson and Canadian Minister Herridge made arrangements for reonvening of the joint engineering leard, which will attempt to agree on procedure in the international section.

NONE of the party leaders in Wash-ington now seem to doubt that there will be legislation to increase federal taxes, for the deficit at the end of the present fiscal year will be too big to be taken care of by further bond issues. Senator Jim Watson of Indiana, majority leader of the scente, said a tax increase was inescapable," and as he had just been in conference with the President it vas assumed this was the opinion of Mr. Hoover. Selator Smoot of Utah. talrman of the flance committee, adlitted there would have to be further exation and thought it might be now sble to obtain passage of a sales tax. S. nator Fess of Oblo said: "The hadget must be balanced even if we are compelled to take drastle measures such as was done in England. the line of effort is reductions which are being made so no to reduce the outlay. The other must be lacrense to revenue, I plan believe that there util the standed ecoise taxes no certolo articles." Schator Hinghom of l'absertieut advacates restoration of unisonce taxes, repectally on roft delaka. The "progressive" Republicana are calling for higher facoune taxes in the ligher brackets, and there may he little opposition to this in either party.

Democratic teaders had feel to say, for their program is not yet settled. Anyhow they expect the adialitistration to recommend the tax increase and thus shoulder the responsibility, after which they can decided how they think the deficit should be met.

A MERICAN exporters, already wor-British tariff legislation, were further dismayed by the nous that the Turk-Ish government had Issued a decree drasifeally limiting the importation of 1,000 articles, no consideration being given to merchandise in customs or en route. America is lift by ilmits placed on such articles as automobiles, motion picture nims, camera films, automobile tires and radios. Comparatively small amounts of these articles will be permitted to enter the country during November and December, and new quotas will be fixed for succeeding months.

You and I

CHARLES S. KINNISON

MAN AND HIS MATE

Our wives believe that we're all right, Despite what others think-And by our side they'll stand and fight To Life's eternal brink!

And though they jihe us 'round the house, For messin' up the place, As our beloved, loyal spouse They'd fight to save our face!

They don't sit down and whine and cry If we've a humble task-If they believe we really try, That's all of us they ask.

Though married life is marred with strife, Sometimes, throughout its span, I still will say a loyal wife

Fearful and Wonderful

Cures for Various Illa An ancient cure for teachache was to leave an offering of meat on a store. Whatever bird took the field away assumed also the burden of the complaint. Almost incredibly childish was that procedure for genoring a stye from the eye. All that was needed here was to push one end of a stick In the fire, point the blazing end towards the affected eye, and which is round rapidly in a circle, repeating "Go look, go back, styc." An old fishernian persisted that he had seen this cure, and that it actually worked. Hiecup was quite simply cured by accusing the patient of theft, but a stiff neck and to be squeezed between the legs of the tongs before it would yield to treatment. Another curious treatment for toothacke. The malady would at once be banished, if a dead man's finger, or a nail from his coffin was put spective provincial and state authori- in the month. The addicted person of Sturday evening.

Voice of Community in

the Advertiser's Words The person who have to read adverdisements is missed one of the most valuable parts of the newspaper. Editorial writers more the on changes and ing? Are prices going up or down? of the program What is the condition of the labor narket? Are food prices still declining? What new autienal products are on the market? What have the great national conserns to say in their institutional advertising? What sort of furulture are posses husing? What's new in the way of household appliances?

What are the large stores "pushing"? The commonity speaks with its myriad voices in the advertising columns and the person who confines his nitention to the non-advertising portions is missing half of the significant mesrages of the day.-Lixchange.

Craftsmen Bonded While the New England colonists were very easier for stilled craftshien to start up their trade in their village. they nevertheless were very eautious and wars, fearful that the arranger uight prove aliftiess and end in beits a burden on the community, un less of course, he had visible means

f support. To protect the colonists.

the town pontless required that some

one go ball for the newcomer. So we read in 16-0: "I, John Usher of Boston, merchant, blad the unto Capt. Thomas Health, treasurer of the sold town, in the sum of farty pounds that William Smith, folner, shall not be chargeable to the town." Another record of the same year states that Robert Mediecot, merchant, signed the bond of John Blake, joiner.

Fame of Heldelberg Heldelberg is now the center of German asparagus culture. It boasts of growing the "finest asparagus the world over." A single stolk of asparason weighting 114 pounds was cut re-

cently at Waldorf, a town on the im-Incob Astor, who emigrated to Amerien in 1783 and eventually laid the foundation for the enormous Astor fortune. He donated \$50,000 to his home town for the construction of the Astor house in Waldorf, a home for aged

TWO-MINUTE SERMON

by REV. GEORGE HENRY

THE OPEN MIND

Often the preacher is accused of narrowness, conservatism, as opposed to innovation, or change, and his accuser is usually one who boasts of an "open mind." He is often a man whose mind is open to question and doubt rather than to reason. His vaporings are usually of the destructive kind. He is so liberal he stands for nothing. He seeks to unsettle faith and has not adequate substitute. An open mind,in the best sense-God give us that. It is well to have an open mind, but unless our thought is constructive, God forbid that the mouth be as wide open. The wise man may change his mind and find himself unable to recall words spoken in the days of his callow mentality. Fundamental teaching can do nothing but with a little knowledge. "Have the mind in you that was also in Christ Jesus "Preach the Word." After 2000 years of destructive criticism it stands creet.
